## PEPPERMINT GROUP

---

Peppermint is an owner-operated group headquartered in Berlin. We are a medium-sized industrial group that produces high quality and innovative **fashion**, **technical** and **home textiles**. We serve the whole textile value chain from spinning yarns to weaving fabrics to printing and finishing textiles. The majority of our products are made in Germany. Our philosophy is to always question what the present provides in order to constantly develop and promote new innovations.

## KEY DATA

---

▪ Annual turnover	€90 million
▪ Export	€55 million
▪ Equity ratio	45%
▪ Employees	750
▪ Locations	6
▪ In Germany	4

## SPINNING

In our spinning mill we develop and manufacture high quality and innovative yarn solutions for the national and the international markets. Our core expertise lies in the areas of transport and aerospace, workwear, industrial, home textiles and fashion.

We see ourselves as a comprehensive centre of excellence in the area of weaving and knitting yarns as we design and manufacture our yarns in close collaboration with our customers, suppliers and machinery manufacturers.

Furthermore we have a fully automated package dyeing machine that allows us to conduct top and cross wound bobbin dyeing. We also dye individual yarn solutions for specific customer requirements.

We focus on the whole process and address the requirements of our customers, from the first development step to the finished product. This allows us to create complex solutions that go beyond the in-house operations.

## WEAVING

As one of Europe's leading weaving companies we are able to develop and produce fine and complex jacquard fabrics that are used for traditional clothing as well as home textiles.

We manufacture our products with an unlimited variety of designs and fabric constructions. Damasks for traditional African clothing and home textiles for bed and table linen are our core competences.

As we manufacture on customer demand our clients enjoy the privilege of exclusive designs and copyrights. Besides raw fabric by the metre, we also produce enhanced fabrics according to our customers' specifications.

## PRINTING

Berlin is the location of our creative design team and the city's urban dynamic vibes can be seen in our COLOR COLLECTION. Our prints and patterns are 100% "Designed in Berlin". We create and manufacture new designs at a high frequency and always with the latest trends from fast fashion to sophisticated fashion in mind.

As professional textile printers we offer a wide range of printing methods as well as dyeing and finishing. We meet the highest demands on printing and finishing and this applies to all of our products from fashion to home and technical textiles.

We can offer the following printing methods: reactive, pigment and also discharge, dispersion, acid, burnout and direct printing with vat dyes. Further, we realise special property requirements for wet and dry enhancement.

We use up to 16 colours when printing with classic rotary screens, resulting in the highest manufacturing quality.

With our digital printing technology we are able to print on all basic fabrics with thousands of color combinations and regardless of pattern repeats. Pre-impregnating and postwashing are included in our process as well as drying, tightening and impregnating. The printing methods are reactive and dispersion printing. In terms of speed of production we are very fast and flexible.

One of our specialties is the combination of the two printing methods mentioned above. We are able to combine rotary and digital printing in order to create totally new designs.
